Build a Simple Feedback Form

Build a Simple Feedback Form

Build a data-entry app, and learn the techniques fundamental to building a

In this tutorial, you will:

- Build your user interface
- Write client-side Python
- Write server-side Python
- Store data in a database
- Deploy your app

Create a new app

Start from a blank app

Clone from Github

Start from a template

Choose from one of our
templates and make it your
own
